EDUCATION

University of Cincinnati — B.S. Information Technology, Software Application Development *May 2026 | GPA: 3.56*

Coursework: System Administration, Network Infrastructure, Database Management, Enterprise Application Development, Information Security, Web Server Development, Mobile Device Programming

TECHNICAL SKILLS

Systems & Infrastructure: Windows Server, Active Directory, Group Policy, MDT, FOG, PXE, SCCM, Intune, Autopilot, Proxmox, Docker, VMware

Networking: DHCP, DNS, VPN, VLAN, TCP/IP, SMTP, Firewall, Zero Trust, SIEM, Endpoint Security, Pi-hole

Automation & Scripting: PowerShell, Bash, Python, Task Scheduler

Development: C#, ASP.NET, React Native, Java, Kotlin, HTML, CSS, JavaScript, SQL Server, Firebase, REST APIs, Git

AI & Tools: Ollama, Open WebUI, Claude Code, Codex, Gemini, local LLM inference, multi-model orchestration

Support & Platforms: Jira, ServiceNow, SysAid, TeamViewer, RDP, SharePoint, Windows, Linux, macOS, Azure, Android

EXPERIENCE

E-Commerce Clerk | Kroger, Washington Court House, OH *Jan 2025 – Present*

- Maintain 98%+ pick-rate and 51%+ perfect-order accuracy on 100+ daily orders using inventory management and POS systems in a high-throughput, time-sensitive environment

Event Staff | UC Conference & Event Services, Cincinnati, OH *Aug 2023 – Dec 2024*

- Configured AV and IT systems for 100+ campus events annually; troubleshoot connectivity issues in real-time maintaining 99% uptime for 46,000+ students and university guests

Infrastructure & Cybersecurity Co-op | Tire Discounters, Cincinnati, OH *Aug 2022 – Dec 2022*

- Engineered PowerShell scripts for AD provisioning, cutting manual onboarding setup time by 40% across 1,200+ employees and 180+ locations
- Built MDT imaging pipeline with automated Lenovo driver injection and domain enrollment, reducing Windows 11 deployment from 2 hours to under 20 minutes; standardized GPO across HQ and regional offices
- Cleared backlogged ticket queue, improved onboarding documentation, and provided on-site and remote support across Cincinnati and Sharonville

IT Support Intern | Total Quality Logistics (TQL), Cincinnati, OH *Jan 2022 – Apr 2022*

- Provisioned 50+ workstations via PXE boot pipeline with department-specific images for a 10,000+ employee Fortune 500 brokerage; managed full hardware lifecycle including decommissioning and certified disposal
- Achieved same-day turnaround on 90% of hardware tickets; documented 200+ Jira cases improving team resolution efficiency

Desk Assistant | UC RED Housing, Cincinnati, OH *Aug 2021 – Dec 2021*

- Managed front desk operations for university residential hall; enforced housing policies, processed parcels, and escalated safety concerns appropriately

TECHNICAL PROJECTS

Multi-LLM Dev Workflow | *Claude Code, OpenAI Codex, Gemini 2.5 Pro, Ollama, Open WebUI, Mac Mini 24GB*

- Architected a three-provider AI workflow routing tasks by model strength: Claude Code as orchestrator (planning/writing), Codex as async adversarial reviewer, Gemini for large-context full-repo analysis — documented with real failure cases at levihuff.net

Proxmox Homelab & Docker Stack | *Proxmox, Docker, Pi-hole, Uptime Kuma, Jellyfin, Bookstack, Home Assistant*

- Migrated self-hosted services from individual LXCs to a unified Docker stack; configured subnet static routing to isolate household service availability from upstream failures

Culinary Mastery | *React Native, Node.js, Azure Cosmos DB, Azure AI Services, Firebase Auth, YouTube API*

- Senior Design capstone (UC Team 7): educational cooking platform with YouTube video integration, Azure Cosmos DB backend, Firebase + Azure 2FA, and Azure AI for translations — presented at IT Expo 2025

AeroAssist Ticketing System | *C#, ASP.NET Core, Entity Framework, MSSQL, Docker, Swagger/OpenAPI*

- Full-stack ticketing app with role-based access control, automated routing, RESTful API, and Docker Compose deployment for homelab and production environments

LocoQuest Mobile App | *Kotlin, Android SDK, Firebase, Google Maps API*

- Android scavenger hunt app using GPS-based navigation, interactive quest system, and Firebase backend for auth and data persistence
